GOLD SUPPLY WILL HAVE TO BE INCREASED

By Col. L. A. May

(Formerly President American National Bank, Birmingham, Ala.)

Political economists and financial philosophers the world over have been in a state of alarm for some time over the falling off in the production of gold, particularly in the United States. Many of the most careful students and thinkers in the world of finance fear there is danger of a gold famine, the present supply being inadequate for currency purposes to sustain the highly elaborate and constantly expanding business and credit structure of the world.

This situation is the more serious since it has been demonstrated and definitely settled, for good and all, that silver can no longer be regarded as a money metal that might come to the aid of gold.

Silver a Mere Commodity.

Even the most ardent worshippers at the shrine of silver were forced to concede at last that silver is a commodity, pure and simple, definitely stripped of all its royal attributes as a money sovereign, actual or potential. Gold is now the exclusive and undisputed monarch of the money world. It is the one and only standard of value.

The realization of the dethronement of silver was slow to dawn on the lay world, especially in Oriental countries, where a reverential feeling existed toward silver, whose history intimately associated with the earliest of human recorls ,is as ancient as history itself. In some countries, at certain early periods of history, the value of silver greatly exceeded that of gold. In Arabia, for instance, 1500 years before the time of Christ, silver was ten times as valuable as gold; and in India about 1000 years later, it was four times as valuable. (Gold at present is 60 times more valuable than silver.) There have been strong sentimental reasons, there fore, that have made it hard for these people to adjust themselves to silver's decline and fall.

Irrestible Evolution

But sentimental attachments, even though rooted in the very beginnings of history could not long bar the progress of economic evolution, which is as irresistible as the movement of the spheres. Hence, poor old silver hadto abdicate her throne.

The result is that gold, and gold alone ,has become the basis of the whole world's currency. The pound sterling is a gold unit. The German mark, the French franc, the Italian lira, the Japanese yen—all are exchangeable into gold. In a word, therefore, all of the business of the world practically speaking, is done on a basis of gold.

In connection with this thought, consider for a moment the astounding fact that whereas the business of the world runs into over three hundreds of billions of dollars yearly, the business is based amounts to approximately only ten billions, an insignificant fraction thereof.

In such a state of affairs, it would be natural to suppose that every encouragement would be given to the mining operators to hasten increased production of gold to avert a threatened gold famine. But the very contrary has been the case for years.

In the United States, where the need for increasd gold producion is so acute as to be tragic, the purblind capitalist not only has done nothing to encourage gold production, but, on the other hand, has apparently done everything possible to hang clogs on the gold miner, and throw obstacles in the path of his progress.

Even the acts of state legislatures, ostensibly conceived to thwart the purpose of dishonest promoters, have been so harshly drawn as praetically to prohibit constructive activities by the most honest and well disposed followers of the gold mining industry.

These and other unfriendly and arbitrary acts have been committed that were calculated to break the heart of the honest miner for gold.

Decline in Gold Production

This antagonism to gold mining started shortly after the beginning of the World War, and the progressive decline in gold production has been constant ever since.

In 1915, the gold production of the

(Continued on page 7)

MINING ACTIVITY AT LAPORTE ENCOURAGING

Mining activities in this section of Plumas County continues unabated, with a number of properties working on development and one or two on production.

The Bunker Hill of which Joseph Buell is superintendent and Frank Riley foreman, has ten men employed as has the Lincoln-Potasi under the personal supervision of Henry Fowler, operator.

Mines Operating Syndicate, Bob Hanley superintendent and L. L. Hilman foreman, is working ten men and the Tabor Development company has eight men at work under Superintendent R. J. McGrath.

At the North America mine six men are employed under the superintendency of William Brown, owner and operator. The La Port Mining Company, C. B. Wingate superintendent and John Scofield, foreman, is working 40 men—the largest force in the district.

It is expected the Bellevue will re-open shortly with at least 40 men on the payroll. The Bellevue, before the World War, was one of the richest producing gold mines in the state and was only closed because cause of the strained relations existconflicting foreign interests could not work together satisfactorily being between their homelands.—Plumas National Bulletin.

BULLION SHIPPED BY SACRED MOUND MINE

The Sacred Mine which is located near Sierra City, has made its third shipment of bullion within the past thirty days to the San Francisco mint. The total amounted to 400 ounces.

The gold will average between $17 and $18 an ounce.

There is also between seven and eight tons of concentrates which will in the neighborhood of $106 a ton, which will be shipped later to the Selby Smelting works.

Although this is an old mine, it had never been developed to the point of production. A tunnel is in 800 feet to the ledge. The ledge is opened up 600 feet with pay ore the entire distanc.

The mill is running three shifts a day. Fifteen men are employed at the Sacred Mound, which is leading Sierra County's newest producers at the present time.

T. W. Callender is superintendent and S. Chatfield is in charge of the mill.

S. R. C. C. HOLD MEETING AT AUBURN SATURDAY

The Sacramento Region Citizens Council will hold its regular monthly meeting at Auburn at the Masonic Temple Saturday, July 12 at 12:15 p. m. Luncheon at $1 per per person.

A number of interesting speakers have been secured.

After the business of the meeting, in cognizant of the heroic work of our pioneer mothers and fathers, the spot where gold was first discovered in Auburn will be marked by a marker furnished by the Council. This good work thus started, should be continued until all such places are marked.

STEVENS AND VADGANSKY PLEAD GUILTY IN COURT

William Stevens of Grass Valley pleaded guilty to a statutory offense and George Vadgansky of San Jose pleaded guilty tocontributing to the delinquency of a minor in superior court here Wednesday.

Judge Tuttle sentenced Stevens to an indeterminate term in San Quentin. Vadgansky asked probation and the matter was referred to the probation officer for report.

Robert Madison of Santa Rosa who is seeking the Republican nomination for a member of the Board of Equalization has been making a tour of the 25 counties in his district and choose to come to Nevada City in time for the celebration on the Fourth.

Orange Ice now on sale at Colley's

NEVADA CITY HOLDS LARGEST CELEBRATION OF ALL TIME

The celebration of the Fourth held here last Friday was considered the largest ever held here. Consrvative estimates place the crowd at 10,000 people and others say that there was possibly 15,000 here during the day.

The celebration ceremony of turning on the new street lights by the P. G. & E. Frank T. Nilon was the speaker and gave a brief history of the P. G. & E which had its beginning in Nevada City.

The concessions along Commercial street were in full swing. A large crowd attended the dance held at Redman's Park.

Friday morning, the Fourth, was 5 a. m. with the firing of the cannon. At 11 o'clock came the grand parade. Numerous horse driven vehicles were first with the occupants in appropriate costume. Mrs. McGonigal drove horse and buggy and had with her James Prichard of the County Hospital who is 100 years old this year. Another old-timer who rode was J. DePrati, who rode horseback all the way from French Corral to appear in the parade| Indians on horseback and walking added to the parade. Many of the ladies in their '49 costumes also paraded. Since it was impossible to get enough horses for a parade of any size, a number of trucks had to be utilized. Space forbids giving a detailed list of the floats, but the mining industry was represented in various ways. One of the most popular floats was the one put on by Hydraulic Parlor Native sons which represented a Chinese laundry. The laundry was in working order and the garments hung on the line brought forth gales of laughter from the spectators. Grass Valley contributed a number of floats.

At 2 o'clock a big crowd filled Nevada theatre to listen to the splendid patriotic literary program. District Attorney W .E. Wright was president of the day.

The following program was rendered:

Invocation by Rev. Peter Ruf.

Solo, "Star Spangled Banner," Mrs. Lyda Talbot.

Reading of Declaration of Independence, Elzear Foley.

Oration, Fred H. Greeley, Marysville.

Benediction, Rev. Father O'Reilly.

In introducing Mr. Greeley as the orator of the day, Mr. Wright made brief remarks tracing the history of our country and the observance of the national holiday. He paid a well deserved compliment to general chairman, Frank Davies and his able assistants, E. J. Kilroy and Miles D. Coughlin.

Mr. Greeley delivered a stirring oration tracing the glorious history of the country dwn through the years and calling attention to its achievements both in war and peace.

In the afternoon Ed Baker held races on Broad street which kept the young people occupied while the gaming concessions on Commercial street occupied the attention of the older members. The streets remaind well filld through th day.

The window displays of old relis were a never ending source of interest. The visitors were all delighted with the quality and quantity of the display as a whole.

On the evening of the Fourth Chief Big Dick and his band of Indians held a big Pow Wow on the Plaza. Another dance was held at Redmen's Park which was also well attended.

Saturday night the Columbia Park Boys gave an exhibition in front of the Chamber of Commerce building. The concessions were packed to capacity until a late hour. Shortly after midnight the drawing was made for the gold mine which was given away. Alton Davies proved the lucky winner.

The expression of the many visitors was one of complete satisfaction. Nevada City had surely given them their money's worth and the praises for the little city rang high.

Chairman Frank Davies of the General Committee wishes to express his thanks to the members of his committees for their faithful work in making the affair such a great success. He also thanks the participants in the parade and the merchants and townspeople for the exhibits. Without the cooperation of the people at large it would have been impossible to have made the great success.

The Fourth of July Celebration of 1930 has passed into history but it is one that will be long remembered.

TRAFFIC OFFICERS HAVE REMARKABLE RECORD

A remarkable traffic record was made here on the Fourth of July in that there were no real accidents in spite of the heavy traffic. Captain Blake estimates that there were more than 1500 machines in Nevada City on the day of the Fourth but not one accident was turned into traffic office. This was largely due to the efficient manner in which the traffic was handled.

An officer was stationed at the corner of Broad and Pine on the evening of the 3rd and on all day of the 4th. This was the point of greatest congestion but with the control traffic moved smoothly forward.

All the roads leading to Nevada City on the Fourth were black with cars. This was especially true of the Grass Valley-Nevada City highway where congestion was especially great.

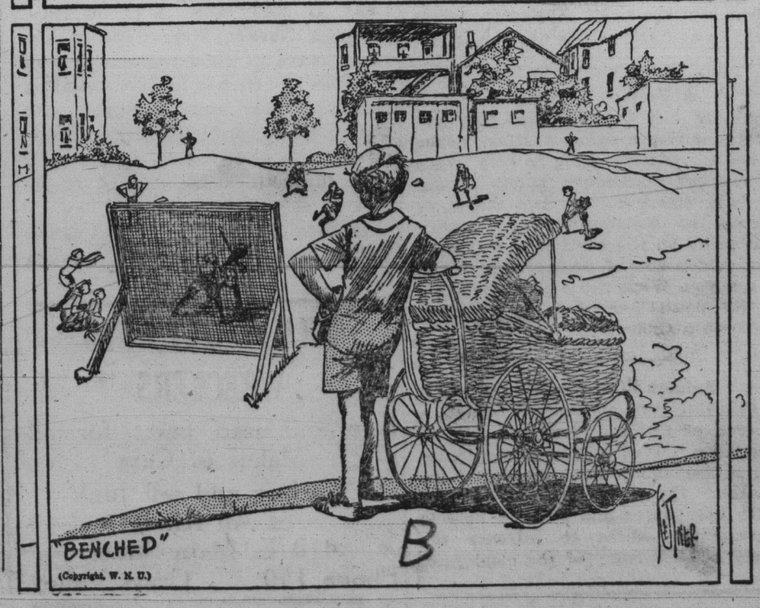
REUNION AT SAN JUAN WELL ATTENDED FRIDAY

Nearly four hundred residents of the San Juan Ridge and former residents enjoyed a reunion at the Ridge on the Fourth of July. Free lunch, consisting of steaks, corn on the cob, beans, rolls, coffee and lemonade, was served.

William R. Tramley of San Francisco, cated as toastmaster and called on Judge Frank T. Deasy of San Francisco as chief speaker of the day. Remarks were also made by John P. Coughlin, formerly of North Columbia, now vice president of the Pacific Gas and Electric Company; Charles Paine of Oakland, Edwin Kinney and Ed Furth. Original poems were read by Mrs. Mary Rundy of Oakland and Henry Huckins of North San Juan.

In the evening a free dance was held in Salaro's hall.

Events in the Lives of Little Men



CITIZENS PROTEST CUT FARM BUREAU MONEY

At a meeting of the Board of Supervisors on last Monday, the Board decided to eliminate the $2000 given yearly to the Farm Bureau of Maintenance purposes. This roused the ire of the farmers who met at the Bret Harte Inn in Grass Valley in order t protest against such an action. A strong committee of the leading men of the county was formed and will attend the meeting of the supervisors this morning in order to register their protss.

ALADDIN DIVIDE CO. COMMENCES WORK

The Aladdin Divide Mining Company is installing 3000 feet of air pine at the Rising Hope channel mine at Placerville, recently taken over on a lease and option to purchase and will have power drills at work within twenty days according to an announcement of President C. N. Miller. The property is fully equipped with machinery and a washing plant with capacity of 18 yeards of hour.

President Miller states that the property was acquired on a four years' option for $85,000 and 100,000 shares of Aladdin stock, to be paid to Atkinson, Orr & Dillion, former operators. All of the net operating profits apply on purchase price until the full amount has been paid. The company will also pay President Miller 50,000 shares of stock to cover expenses involved in the examination and exploration of the property.

MINING ASSOCIATION MEETS AT WEAVERVILLE

Northern California Chapter of the Mining Association of California are hlding a fine meeting at Weaverville today. The meeting starts with a luncheon at noon.

The speakers include M. E. Dittmar, M. H. McCarthy of Etna, J. C. Kempvane, Jr., State President of the mining association, C. S. Brooks, Secretary of the State Association, Walter Bradley, State Minerologist and C. V. Averill.

SCHNELLMAN CAR FORCED TO LEAVE GRADE

While on his way to Nevada City last Tuesday John Schnellman of Pike City narrowly escaped serious injury when his car was forced over hte grade by a passing motorist. His car rolled over four times. The driver escaped with slight scratches. Wm. Lackland of North San Juan, who was just behind Mr. Schnellman brought him to Nevada City and the tow car was sent for the damaged machine.

J. D. SPENCE AWARDED DOWNIEILLE CONTRACT

Effective July 1st the mail contract for transportating mail between Nevada City and Downieville was taken over by J. D. Spence of Grass Valley. Lester Jaynes will driv the stage. M. P. Fischer still holds the permit for hauling passengers and freight.

Steve Matteoda of North Bloomfield was awarded the contract for the mail route to Graniteville.

No other changes were made for the coming year.

ARTHUR W. NICHOLLS AWARDED DAMAGES

A jury in the local Superior Court awarded Arthur W. Nicholls $8,340 as a result of a condemnation suit filed by the Pacific Gas and Electric Company for land along the abnk of Bear river near Dutch Flat.

The award included flowage rights pany over the lan dat a cost of $2 to the Pacific Gas & Electric Comper foot and $1500 damages.

Superior Judge Raglan Tuttle of Nevada County presided over the case. It took the jury over three hours to arrive at a verdict.

Ed Uren, Wm. Maguire were witnesses for the P. G. & E.

MURCHIE MINE CUTS NEW BODY OF FINE ORE

The east drift 1300 was advanced to a point 142 feet east of the station. At 80 feet a small lens of high grade re was developed and the last 62 feet has been in a satisfactory width of mill ore. At 130 feet a development of importance was made in the opening of a cross vein which displaces the Bib Blue vein for a short distance. This cross vein exhibits rather better stronger and values than does the Big Blue. There are twelve major fissures in the Murchie property and this development is thought to be of importance as it is the fourth one of these twelve that has been opened in the present workings.

The newly-developed east shoot on the Big Blue is also gratifying as it is the first one east of the shaft that has been opened below the 500 level and possibly, indicates an ore below extending from the 1300 level and the 500 level which can be served without added shaft-sinking.

The west drift, 1300 level has been alvanced 582 feet from the shaft. Of the distance, 280 feet is in the second ore shoot. It is expected that the west end of the second ore body will be reached at an early date, when drifting will be suspended and this block prepared for stoping.

EUGENE DICKINSON HIT BY AUTOMOBILE

Eugene Dickinson, 12, son of Mr. and Mrs. E. W. Dickinson of Nevada City was taken to the Sanitarium with a broken leg as the result of a collision with a car near the library Wednesday. The Dickining firecrackers and in the excitement did not notice the car. The Dickinson boy and another boy were shooting firecrackers when the Dickinson boy struck the back of the car and was thrown to the street breaking his leg.

He was taken to Dr. Werner for treatment and then to the Sanitarium where the bones were set.

DOWNIEVILLE HAS BIG CELEBRATION ON FOURTH

DOWNIEVILLE, July 5.—(Special to The Nugget).—The Fourth of July was celebrated here in a fitting manner with a parade at 2 o'clock after which there was races of various kinds. In the evening came the big dance. It was a very successful affair.

A wedding took place on the 4th at the St. Charles Hotel with Judge H. B. Neville officiating and the contracting parties were John S. B. Hill of Brentwood and Miss Evelyn Lee Webb of Knightson. The groom was a former resident here. H. D. Hill being the locator of the Oro Mine back of the court house.

Four people were injured early Friday morning on their way to take in the celebration at Downieville. They were Laurence Smith, Francis and Donald Dutra and Miss Walsh all of Marysville. Laurence Smith was driving and it is thought he fell asleep at the wheel and failed to make the turn.

The car plunged over the grade and was reduced to splinters. It is miraculous that the party escaped death. Passing motorists brought the injured parties to town where Dr. Carl Sutton attended their injuries.

OLD RESIDENT FOUND DEAD IN HOME TUESDAY

Henry Page,a native of England, who has lived in this vicinity for the past 30years, was found dead in his home last Monday forenoon by a man who called to talk over a real estate deal. The sheriff and coroner were called and after looking things over were satisfied that Mr Page had died of natural causes, probably heart failure.

Funeral services were held Tuesday from the Little Church Funeral Home, Rev. Peter Ruf officiating.

COZY CORNER CHAT

Nevada City, true to its reputation, came nobly to the front and put forth one of the biggest celebrations held in recent years. That's Nevada City. They might sputter a little but when it comes to the final analysis everyone is there to do their bit. This makes it possible for a city the size of this to do things that in other places would be impossible We have one of the finest little cities in the world and we want other people to know about it.

The window displays of the past week show no dirth of relics of former days. We only hope that interested collectors won't try to obtain the relics. They belong to Nevada County. It might not be a bad idea to start a museum here in Nevada City. One of the old brick buildings on Commercial Street would be an ideal place for it. Many of the relics are valuable and some even priceless. Let's save them for posterity.

A great deal of interest has been taken by the old residents in the many old group pictures on display and discussion as to who was who. The pictures range all the way from infant pictures and group pictures of miners and lodges.

The Nugget was the first to suggest the '49 Celebration and was glad to do its part and is most happy at the successful outcome. Frank Daives is to be highly commended and congratulated for his untiring zeal in putting over a celebration of such magnitude. We only hope the many words of praise he has received in a manner compensates him for the effort.

Amonth has passed since the reins of The Nugget has rested on our shoulders. Needless to say it has been a difficult one but we squared our shoulders and carried on and now we are glad. So many kind letters have come commending our work and wishing us success. The spoken word and handclasp have helped when our courage has faultered.

Last week a Nugget friend from the country came into the office and said, "My subscription isn't up until next September but I thought perhaps you would appreciate getting this at this time. The Nugget has done more to boost mining than any paper in the state of California and I am back of it for all time". His years number far more than the three score ten but his fighting spirit remains undaunted.

Use of Ducking Stool Common in Old Times

The ducking stool was never in the New England colonies very common. It was used more extensively in the Southern colonies, especially Virginia. But wherever it was used it was reserved for one purpose; to reprove scolding women. In New England there were not many places where the ducking stool was especially favored, though it may be that the magistrate who ordered a woman ducked, "when the weather became more seasonable," may have given a hint as to the reason.

There is a record of a woman who was unfortunately drowned while being ducked. The ordinary practice in ducking was to submerge the duckee for about a half minute. She was then brought to the surface for air and asked if she repented; if she began again where she was when she was interrupted, she was dropped into the pond again, and this process was kept up until she promised to be good.

Frequently it was surprising how much water was necessary to quench the fire of feminine tempers. The woman who was drowned had been ducked several times and finally her unaccountable silence inspired the duckers to investigate, whereupon she was found to be dead. This was considered to be unfortunate but her own fault.—Boston Herald.

Claim Definite Proof of Mother Earth's Age

Halley, of comet fame, tried to find out the earth's age by calculating the time it took the rains and rivers to wash the salts from the lands into the oceans. Geologists likewise calculated the time it took for rivers to deposit their deltas, for the Niagara to gouge out its gorge and for the geological strata to be laid down. But all such methods were defective. Like hourglasses, neither the rivers nor the sands ran uniformly.

In uranium physicists claim to have at last found a reliable self-recording clock, says the Los Angeles Times. Disintegrating, it gives off gases and the final residue is lead, the rate of disintegration being definitely known. After three billion years an ounce of uranium would not weigh an ounce; nearly one-third of an ounce would be represented by lead. As uranium is always found associated with .306 per cent of its own weight in lead, it is easy to calculate that some three billion years have elapsed since the first lead was formed.

LIGHT LITERATURE

Wife—How can you see to read when it's almost dark?

Hubby—This is light literature, dear.

Registering Trade Marks

Trade marks were first registered under laws of the United States in 1870, under the act of July 8, 1870. During 1870 there were 121 registrations under that law, the first thereof (No. 1) under date of October 25, 1870, by Averill Chemical Paint company of New York. Prior to the enactment of such law protection was sought to be secured in a few instances through taking out patents for designs for trade marks. The act of July 8, 1870, within a few years was declared void by the United States Supreme court (trade mark cases) as unconstitutional. The subsequent act of March 3, 1881, was superseded by the act of February 20, 1905, which was supplemented by the acts of May 4, 1906, and March 19, 1920, all of these three now in force.

Another Record

There was a tremendous crash. Farmer Jones, who was working in one of his cowsheds, rushed out into the farmyard, and, looking up into a nearby tree, he saw a small airplane lodged in the topmost branches.

"What do you think you're doing?" he asked the airman, who had, fortunately, escaped injury and was in the act of climbing down the tree.

"I was trying to create a new air record," returned the other sadly.

"And you've succeeded," exclaimed the farmer. "You're about the first chap who has climbed down a tree without first climbing up."

"Run-Off" After Rainfall Affects Water Power

In the study of the matter of rainfall, it has been gradually realized that the "run-off" calls for just as much investigation as the precipitation. In fact, it has been found that the "run-off" is even more variable than the rainfall. The "run-off" is that part of rainfall which finds its way to the streams and is available for generating hydroelectrical power. This "run-off" is not a fixed percentage. When the ground is very dry it absorbs all the rainfall and there is no "run-off." When the earth is saturated practically every drop of rainfall runs off. Thus, when a severe drought strikes an area usually well watered, the drop in "run-off" is much more pronounced than the shrinkage in precipitation. All of this has been known in a general way, but it has taken a prolonged dry spell to make it really appreciated, and water power plants that were planned from rainfall records without proper allowance for the still greater fluctuations in "run-off" have suffered.

The recognition of this relationship will undoubtedly save the industry many millions of dollars in unprofitable investsments and will safeguard the consumer because of greater reserves that will be provided hereafter.

Wright Brothers Showed Genius in Early Years

According to the first biography of the inventors, "The Wright Brothers: Fathers of Flight," by John R. McMahon, they showed their inventive minds at an early age. When Orville was ten and Wilbur fourteen they constructed a wood-turning lathe out of lumber from the wood pile, parts from an old buggy and marbles for ball bearings. Its power plant was a foot treadle long enough to accommodate the feet of six boys. When Orville was seventeen and Wilbur twenty-one they built a printing press with a second-hand tombstone as the flat bed. Their first revolutionary discovery was made from a cardboard box from which Wilbur had just sold a bicycle inner tube. Orville had previously concluded that lateral balance would be necessary to successful flight. As his brother twisted the sides of the box he evolved the very principle they had been seeking. This became the warp which, in its present form of aileron, is essential to the sidewise balance of airplanes.

Insect Resembles Leaf

The walking leaf, an insect species the female in which has disguised herself to resemble vegetative life probably more cleverly than any other, comes originally from the island of Ceylon, but has been raised in Europe, whence eggs have been imported to America. When the young emerge from the eggs they are very active and a bright red in color, says Nature Magazine. They do much walking about, but do not begin to eat until they are about one week old. A week later they have begun to turn brown and by the time a fortnight has passed the females are green, which color they maintain until they perish. The older and larger they get—and they grow to be four inches long—the more do they resemble a leaf. In their native country they feed on tea leaves and leaves of certain species of lemon trees.

Planned Great Memorial

Nearly 80 years ago a Santo Dominican, Don Antonio Delmonte y Tejada, conceived the idea of a fitting memorial to Columbus. His proposal was: "Let us erect in the most visible and notable place in America, in a central point and where it may be visited by travelers as they approach her shores, the statue that his greatness and remembrance demand. Let this statue be a colossus like that of Rhodes, and let it be designed by the best sculptor available and with funds raised by popular subscription in all the cities of Europe and America, and let this statue have its arms extended and pointing to one and the other of the American continents."

Prickings of Conscience

The first contribution to the national conscience fund was made in 1811. Money received for this fund is not carried on the books of the Treasury department as such, but is listed as miscellaneous receipts. The amounts sent in range from two cents for a person who failed to put a stamp on a letter when mailed, to several thousand dollars from persons who smuggled goods into the United States without paying import duty. Usually the sums sent are small. The total amount sent in now amounts to about $578,000.

A Prompt Suggestion

"What can I do," roared the fiery orator during a demonstration, "when I see my country going to ruin, when I see our oppressors' hands at our throats, strangling us, and the black clouds of hopelessness and despair gathering on the horizon to obliterate the golden sun of prosperity? What, I ask you, What can I do?"

"Sit down!" shouted the audience. —Toronto Globe.

Salmon Fisheries Blessed

Carrying out an ancient ritual, a church of England clergyman blesses the River Tweed salmon fishing industry in England at the beginning of the season. Homes are also "asperged" with holy water and services held in government offices to increase the piety and efficiency of the employees.

The KITCHEN CABINET

(©, 1930, Western Newspaper Union.)

The most loveable quality that any human being can possess is tolerance. It is the vision that enables one to see things from another's viewpoint. It is generosity that concedes to others the right to their own opinions and their own peculiarities. It is the bigness that enables us to let people be happy in their own way instead of our way.—Rotary Bulletin.

GOOD THINGS TO EAT

Salads are always in order, and one never tires of new combinations and different ways of serving them.

With the tender new carrots on the market, a most tasty salad may be made with fresh grated carrots, a little finely minced onion and celery, stirred into a lemon gelatin and allowed to mold. Serve on lettuce with a snappy mayonnaise dressing.

Chicken salad the way Hawaiians serve it is made as usual with chicken and celery with the addition of as much finely-cut pineapple as chicken. Garnish with asparagus tips marinated in french dressing.

Melon Cocktail.—This is a most delightful beginning for a meal. Scoop out balls of honey dew or watermelon—both, if you can have them. To one cupful of sugar and one-half cupful of water boiled together add one tablespoonful of mint and the grated peel and juice of half a lemon. Cool the sirup and pour over the melon balls. Strain the mint from the sirup and garnish with a fresh sprig of mint when serving.

Potato Salad a la Russe.—Take one quart of cooked potato balls, one teaspoonful of onion juice, one cupful of cooked peas, six sardines, salt, paprika and one cupful of mayonnaise, two or three cooked beets and three hard-cooked eggs. Mix all the ingredients and garnish with the beets and hard-cooked eggs. Arrange the salad on lettuce and place the sliced eggs in overlapping rings around the base of the salad.

Collards.—These are greens used much in the South and may be grown in any climate. The flavor is like very mild cabbage and there is a slightly bitter taste. Cooked as spinach or served with and cooked with salt pork, they make a very palatable and nourishing dish.

Nellie Maxwell

MAKE MOCK ON BAN PLACED ON CORSETS

The corset, writes Looker-On in the London Daily Chronicle, which threatens to resume its old whalebone rigidity with the return of longer skirts and tighter waists, must rank among the articles of dress which, however often denounced, seem invulnerable against attack. Louis XIV of France, though he suppressed the high headdresses of court ladies by a word, could not win obedience to a decree against the corset, and when Charles X, proving once more that the Bourbons are unteachable, condemned it to extinction, it was noted that the ladies merely clasped it about them more tightly than ever. A more subtle move was that of the Emperor Joseph II of Austria, who sought to discredit the corset by ordering that women of bad character or convicted of serious crimes should be made to wear them. But even that did not discourage the others!

Islands to Meet Planes

Concrete "islands" that may be floated to meet planes crossing the ocean are possible, according to Charles de Frassee, a French inventor, whose model of the novel "seaports" was recently exhibited by the Chamber of Commerce of France. De Frassee says that his islands would be seaworthy enough to take up stations as half-way stops in transoceanic flights. Planes would land on them for refueling and take off with the aid of catapults similar to those now used for launching planes from ships. The islands would have hangars and living quarters for permanent crews of mechanics, and two giant 2,500 horse power motors would propel them to their locations.

PREMISES FOR SALE—

The residence property of the late Chas. H. Eddy and wife on Prospect St., Nevada City. 9 room: 1½ story house in good repair and well furnished. Large lot commanding excellent view. Movement to Preserve Forests Traced to 1873

Following the Civil war settlements sprang up throughout the West. Wood in greater and greater quantities was needed and louder than before the note of alarm was sounded. We were using up and burning up our timber with frightful rapidity. From Europe scholars were returning, says Forest and Mankind. They told how France, Germany, and other countries were able to have the penny and the cake both; how they were able to cut timber from their forests year after year and still have increasing quantities.

In 1873 a committee of forestry of the American Association for the Advancement of Science presented a report to congress stressing the importance of preserving our forests and in answer to this the first significant step forward was made by the federal government. It appointed a forest agent to investigate conditions. Later this position expanded and grew into the division of forestry.

Had the Written Word to Prove Her Statement

She's only a freshman now, in Hollywood high, but one of these days she's going to be a movie star. In the meantime, history is causing lovely Joan no end of trouble. The other day, in class, she stated that the British were terribly ungallant in that they had shot Joan of Arc.

"But they didn't shoot her," asserted the history teacher. "Do you mean to say you failed to read the dramatic account of how she was burned at the stake?"

"Yes," said Joan, "I read all about that, but I thought maybe it was movie fire and didn't kill her. Anyhow, it said on the next page that she was shot."

"You'll have to show me, dear," insisted the teacher.

"All right, here it is," said Joan triumphantly. "It says right on page eighty-four that she was canonized." —Los Angeles Times.

Great African Lake

Lake Nyasa, which covers about one-fourth of the protectorate's entire area, is the third in size of the great lakes of central Africa. It is 340 miles long and its greatest width, which occurs at the center, is 45 miles. The total area of the lake has been estimated at 11,000 square miles. Its waters are carried into the Zambesi via the River Shire. Nyasaland and its great lake were only vaguely known until 1859 when David Livingstone and the German traveler, Albrecht Roscher, explored it simultaneously, Livingstone from the south and Roscher from the east. Since that time it has been the scene of civilizing work on the part of missionaries and government officials.

Restoring Old Paintings

Old paintings can be restored by an amateur by the careful use of spike oil of lavender, a solvent, the value of which for this work is not widely known, even among those who claim to be expert restorers. The oil should be rubbed on lightly with the fingers or with a pad. It will be found that it dissolves the varnish that has accumulated on the surface of the painting and releases the dirt. This oil was used by some old masters as a vehicle for pigment before linseed oil was adopted generally for this purpose. We would strongly advise, however, that if possible you should take the painting to an expert, to avoid the chance of accident due to inexperience.

Early "Magazines"

While our Colonial ancestors had no sensational newspapers and magazines to entertain them with tales of adventure and misadventure, in many of the small printing shops of the Colonies there were printed books and pamphlets containing the exciting and often lurid details of the trials of pirates, the hangings of criminals, the struggles of the righteous with evil, the conversion of the evil to religion, the sinister designs of the opposite sex, the dangers of drink, and also of abstinence.

Church Communion

The "Encyclopedia of Church History" defines open communion as the service of the holy communion of saints, which is open to all who apply, irrespective of creed. In close communion the service is confined to the members of a single society, or at least to the members of a denomination who are baptized. By communion of place is meant the administration of the sacrament in a consecrated building. It also refers to the retention of the host.

Old English Expression

A nine-day wonder is something that holds attention for a few days and then is forgotten. The expression is very old in England. It was used by Shakespeare. It is thought to be based on the old proverb, "Wonder lasts nine days and then the puppy's eyes are opened," referring to the fact that dogs are born blind and their eyes do not open for about nine days.

Wrong Start

If more and better home training were given to youngsters between the ages of one and six, less responsibility and blame would be laid upon school teachers for giving them a "wrong start."—Country Home.

The KITCHEN CABINET

(©. 1930. Western Newspaper Union.)

"We think that conspicuous events, striking experiences, exalted moments, have most to do with our character and capacity. We are wrong. Common days, monotonous hours, wearisome paths, tell the real story. The vision may be dawn, the dream may awaken on some mountain top, but the test, the triumph is at the foot of the mountain, on the level plain."

DESSERT, FISH, MEAT SAUCES

A delicious sauce to serve on a cottage pudding or any steamed cake is:

Butterscotch Sauce. — To one cupful of boiling water add one cupful of brown sugar, two tablespoonfuls of flour, a dash of cinnamon, and one-fourth teaspoonful of salt thoroughly mixed. Cook until the flour has lost its raw taste and the mixture thickens, stirring to prevent lumping. Beat in two tablespoonfuls of butter and remove from the heat, adding one-half teaspoonful of vanilla or coffee extract. This is good served hot on ice cream, custards or baked puddings.

Hard Sauce.—Cream together one-fourth of a cupful of butter and three-fourths cupful of powdered sugar, add one-half teaspoonful of vanilla and one-eighth teaspoonful of grated nutmeg. Long beating makes a creamy, hard sauce. Add the sugar slowly. For variety substitute brown sugar and flavor with maple or grated lemon or orange rind.

Horseradish Sauce.—This is good with fish or cold meat and well liked with beefsteak. Beat one-half cupful of cream until thick, add one-half teaspoonful of salt, one teaspoonful of sugar, three or four tablespoonfuls of fresh grated horseradish and a teaspoonful of vinegar. Good for a sauce over cooked beets.

Spanish Sauce.—Add two tablespoonfuls of chopped onion to two tablespoonfuls of butter and cook until tender and yellow. Add one chopped green pepper, one-half cupful of celery, two teaspoonfuls of minced parsley, one bay leaf, two cupfuls of tomato, one tablespoonful of flour and salt and pepper to taste. Blend the flour with a little butter before adding to the sauce. Cook for half an hour, remove the bay leaf, cook ten minutes longer, adding the flour and butter at this time. Now add four tablespoonfuls of minced ham and serve at once.

Nellie Maxwell

SIX CYLINDER..... SENTENCES

By DR. JOHN W. HOLLAND

A mother's knee is the world's best altar.

The youth who breaks with his mother will run amuck with Luck.

Full grown men cannot grow too big for their Mother's God.

The earth's moral sunshine is the poured-out radiance of a mother's love.

Admit no one to your friendship who would dishonor his First and Best Friend.

The girl who thinks that she has outgrown her mother is still too Little to appreciate her.

(©. 1930. Western Newspaper Union.)

LEGAL NOTICE

State of California
Department of Public Works
Division of Water Resources
Sacramento

NOTICE OF APPLICATION TO APPROPRIATE WATER
Application 5876

NOTICE IS HEREBY GIVEN, THAT Spanish Mining Company and San Francisco Commercial Company % Robert Beale, Atty., San Francisco, California, has under the date of April 9, 1928, applied to the Division of Water Resources, Department of Public Works, State of California, for a permit to appropriate unappropriated water, subject to existing rights.

Description of Project

Water to be appropriated from Poorman's Creek tributary to South Fork of Yuba River.

County of Nevada.

Amount applied for: 15 cubic feet per second.

Diversion season named: January 1st to December 31st of each season.

Water to be used for power purposes.

Point of diversion within SE ¼ of NW ¼ of Section 31, T 18 N, R 11 E, M. D. M.

Place of use described: (Lot 3) NW ¼ of SW ¼ Section 31, T 18 N, R 11 E, M. D. M. Water to be returned to Poorman's Creek within (Lot 3) NW ¼ of SW ¼ Section 31, T 18 N, R 11 E. M. D. M.

Relative to Protests

Blanks upon which to submit protests will be supplied free upon request by the Division of Water Resources.

Any person desiring to protest against the granting of such permit shall within SIXTY days from date hereof, file with the Division of Water Resources, Sacramento, California, a written protest. Such protest shall clearly set forth the protestant's objections to the granting of the application and shall contain the following information:

(1) Statement of injury which would result to protestant from such appropriation and use.

(2) The basis of protestant's water right.

(3) Protestant's past and present use of water both as to amount used and land irrigated, or use made of water if other than irrigation.

(4) The approximate location of such land or place of use and of the point of diversion of the water.

A copy of the protest should.. be sent to the applicant and this office notified that the same has been done.

EDWARD HYATT,
State Engineer.

Dated: Sacramento, California, June 27, 1930.

July 7, 12, 19, 26

Dr. and Mrs. Roth of Los Angeles are spending a few days with Mrs. Nellie Phelan.

Mr. and Mrs. Ray Week and son of Fresno, were visitors at the Ed Norton home.

FRENCH CORRAL ITEMS

FRENCH CORRAL, July 7, (Special to The Nugget)—Well, some of us haven't yet gotten over the warmth of June's farewell. With the 100° mark for nearly a week, those who can not stand hot weather, went through some misery. But July has arrived with a delightful change of temperature and some of us think we shall recover sufficiently to enjoy the glorious 4th.

Well, it is only one day away now —this wonderful "come back" we San Juan Ridgidtes are expecting, and also the 49er festivities that will be put on in Nevada City. Our hearts just thrill with enthusiasm and we are looking forward to the most wonderful 4th of all the years.

Joseph Swazey and Harry Browning had business in Nevada City Thursday.

W. P. Clerkin and sister, Miss Millie, came down from their home near Pike City Thursday and visited with friends in French Corral. From San Juan they were accompanied by Mrs J. McCullough. Their French Corral nhbors sadly miss them during the summer months and are glad when the fall and winter months bring them back to us.

Harry and Clyde Browning went to Nevada City Friday. Their mother Mrs. A. Browning, returned with them.

Mr. and Mrs. C. Meyers and Mr. Meyers aunt, Mrs. Laura Hardenbrook, and her daughter, Mabel, went to Grass Valley Saturday to visit Mrs. Hardenbrook's sister, Mrs Mary Mitchell. Mrs. Hardenbrook will remain with her sister for some time.

Mrs. Madge Conway and son, Walter, came over from Olympia Park where they are with a camping party to spend Saturday with friends in French Corral.

Mrs. H. Clymo and sons, Harold and Frank, and Miss La Vern Doris, came from Benecia Saturday to visit Mrs. W. E. Moulton. From Sacramento they were accompanied by Mrs. Moulton's daughter, Frances. French Corral is the old home of the Clymo family. Harold Clymo and Miss Doris returned to their home in Benecia Sunday evening. Miss Frances Moulton accompanied them as far as Sacramento.

Mr.and Mrs. Clarence Meyers and Mrs. Meyers little nephew, Jr. Butler, and Miss Mabel Hardenbrook have gone to Richling, Oregon. Mr. Meyers owns a large range in that state and his intention is to stock with sheep. They expect to remain for some time.

Misses Alice and Virginia Day of Tyler visited French Corral friends Sunday.

Mr. Dernon Stoll who is candidate for the office of District Attorney visited this section Sunday. One by one the candidates are dropping in to present themselves to the people. —Wonder if they will ever go back to the delightful old way of coming in a body, and making their visit one of the important events of the season?

Clyde and Harry Browning and J. Swayze made a trip to the Mt. Alta Gravel mine above Camptonville Monday.

W. E. Multon made a business trip to Sacramento Monday.

Mr. E. De Prati, our grand Civil War Veteran, went to Nevada City Tuesday. He will probably remain until after the 4th.

Mr. A. Holmes of Nevada City, who is seeking the office of coroner, was a Tuesday caller. His many friends were pleased to see him.

Mrs. E. Chatty and little son, Billy and her father, J. W. Culver made a trip to Nevada City Wednesday. Little Billy was quite ill and they lost no time in getting him t oa doctor. We are glad to learn however, that the trouble is not serious.

Mrs. Ted Schwartz of Pleasant Valley was a Wednesday visitor.

Our sheriff, George Carter was making friendly calls Wednesday. From his costume we thought a '49er had come back. His many friends were glad to see him and wish him all kinds of future good luck.

—0—

E. J. N. Ott tasted the fountain of youth during the Fourth of July Celebration and when he shaved off his '49 whiskers ordered a clean shave. He has worn whiskers for 40 years and when he saw how dapper he looked he spruced u pin a new suit and a new straw hat. The results were startling. Even his wife failed to recognize him. E. J. N. is a familiar figure on the streets but his townsmen did not know the dapper young man who appeared on the streets. The only thing about his appearance than remains unchanged is his genial smile.

DOWNIEVILLE ITEMS

Miss Carmen T. Veck, daughter of County Treasurer Mrs. M. E. Lambert, and Sierra county, was married to Walter Denton on Sunday, the wedding taking place in Los Angeles.

The bride was born in Fresno but reared in Sierraville and Downieville, going to Los Angeles to attend a high school about a year ago. The groom resided in Downieville for a year or more, and it was here that the affection which resulted in marriage was formed.

Both Carmen and Walter are loved and respected by a large circle of friends throughout Sierra county, and hearty congratulations are offered.

From what I can learn there was undoubtedly a murder at Lusk Meadows. Blood for test was sent to Berkeley on Monday and if this is found to be human blood it is a sure thing. Hair likely coming from a woman's head was also found, and the interior of Mrs. Blosoom's house was a wreck showing that a desperate fight had taken place there. The blood was still wet when found, showing it was les than 48 hours old. Sheriff Bynon says he has a clue, but District Attorney McMahon is keeping very quiet until the tests for human blood are returned from Berkeley.

—0—

Mr. and Mrs. William Mcguire have had two additions to the ranks of their grandchildren in the past two weks. The first was a daughter born to Mr. and Mrs. William Mcguire on June 23 in Oakland, California. The child was a 7 3-4 pound girl and was named Nancy Luella.

On July 1 in Oakland a son was born to Mr. and Mrs. Ralph Meredith. Mrs. Meredith was Miss Edna Maguire.

Grandma Maguire went to Oakland last Thursday to be with the new babies. She was accompanied by her little granddaughter, Patricia Maguire, who has been spending two weeks in Nevada City with her grandparents.

—0—

Mrs. Ambrose Phelan is visiting her mother-in-law, Mrs. Nellie Phelan. She is en route from San Francisco to Chicago to join her husband in Chicago. This is the lady's first visit to hte mountains and she is delighted with them.

Foresees Man of Future Advance in Brain Power

A steam locomotive is only 10 per cent efficient. The average human brain, according to many psychologists, is even less efficient. Dr. Ales Hrdlicka, anthropologist of the Smithsonian institution in Washington, has declared that evolution will produce brains a hundred times more effective than those men now have, Popular Science Monthly reports. When the mechanism of the human body is altered so that millions of tiny cells that form the cortex of the brain receive a larger supply of rich, pure blood, Doctor Hrdlicka says, the power of the brain for sustained thinking will increase many fold.

After fifteen or eighteen hours of work the poisons of waste matters, like "clinkers and ashes," clog up the brain and impair its effectiveness. Sleep is necessary to allow the blood stream to wash away the impurities and bring fresh food. When evolution produces men whose brains receive a more abundant blood supply, Doctor Hrdlicka maintains they will be able to concentrate for longer periods and will require less sleep to remain alert.

When Sergeant Major Turned Stage Manager

One of Compton Mackenzie's stories concerns Edmund Gwenn, well-known English actor, who had enlisted at the beginning of the World war in the royal artillery. Gwenn was horrified one day to hear the harsh voice of an orderly shout in the barrack room:

"Bombardier Gwenn to see the sergeant major at once!"

He entered the presence, wondering nervously what military misdeed was responsible for the summons.

"Bombardier Gwenn," said the great man, turning over some papers without vouchsafing a glance at the insignificant atom quaking before his desk, "Bombardier Gwenn, I have been looking through your military history. I find that before you joined his majesty's forces you were an actor. The sports will be held next Thursday afternoon. You will dress up as a woman and amuse the women and children between the events. Right about!"—Kansas City Star.

Religion and Names

In all old historical records the Christian name John appears with remarkable frequency. The reason for this is easily explained. In the pious Middle ages parents, at the baptism of their boys, chose the name of the apostle.

Thus, when Bishop Hatfield made a survey of the population of 1380 he found that 44 per cent of the male population were Johns. Twenty-two per cent were Williams—a survival of the popularity of the Norman conqueror.

There were, likewise, many Thomases, a name which many devout parents gave their infants after the murder of Becket in Canterbury cathedral.

In the Fourteenth and Fifteenth centuries most girls were named Agnes or Alice, Isabella, Matilda and Cecilia. The commonest girls' names today are Ann and Elizabeth. Sarah, once popular, comes seventeenth on the popularity list now.—London Mail.

From Illinois

Until the arrival of the new baby sister, Bobby had been the only child of the family. A faint trace of jealousy prompted him to ask his mother where the new arrival came from. The mother's reply was that the baby had come from heaven.

"Did I come from heaven, mother?" was the next question.

"Why, yes, Bobby," the mother replied.

"Did you come from heaven, mother?"

"Why, of course, Bobby; we all came from heaven."

"No, you didn't, mother. I heard daddy say you came from Illinois."—Indianapolis News.

Bomb-Proof Auto

The most costly and luxurious automobile ever brought to China was built in the United States for the president of the Nanking government. The whole of the metal work on the body of the limousine, and even the hood, is of half-inch thick navy steel plate, which is designed to shed the bullets or bombs of would-be assassins. Two extra seats project from the back of the car, built high enough to permit the occupants to see forward over the hood. These will be occupied by special guards with machine guns. The running boards are unusually long, for guards to stand, each with a revolver in hand.

Lump of Luck

One day, in the spring of 1903, two navvies quarreled while at work on a rough railway track made for hauling lumber. High words led to blows and one man flung an axe at the other. It missed him but struck a boulder, splitting it in two and showing up in its heart a mass of glittering whiteness. It was a lump of almost pure silver—and the miracle silver city, Cobalt, in Northern Ontario, came into existence.

Penalty for Fighting

Stags, moose, caribou, and elk often fight so furiously that their horns are hopelessly interlocked and the animals starve or die of exhaustion.—Country Home.

FASHIONS for the SMART WOMAN

S3

FOR COMFORT AND CHIC

Isn't it simply grand that for once, Fashion allows us to be comfortable and chic at one and the same time? Pajamas have done the trick, in them we can lounge to our hearts content and know that whatever comes, like a fire or something, we may appear well-dressed. They may be extremely colorful, too.

Capelets add to the charm of the first costume. The trousers are firmly fitted around the hips by a band, and darts back and front provide fulness. The second set is as practical, with a pointed hip-yoke and trouser darts. The blouse has a shoulder yoke cut in pointed outline, and a bow.

PITHY PICKUPS

The habit does not make the monk.—Erasmus.

Bravery never goes out of fashion.—Thackeray.

Delay of justice is injustice.—Walter Savage Landor.

It ill becomes a philosopher to be cast down in mind.—Cicero.

Courage is the thing. All goes if courage goes.—Sir James Barrie.

Sooner or later, you have to quarrel with persons who ask too many questions.

It was geese that saved Rome, but it is gumption not geese that save a community nowadays.

Most grown people wish they had the nerve to walk down the street sucking on a lollipop.

How fast your enthusiasm for a new friend fades when you find he doesn't keep his appointments.

Boys like to go to the woods with an uncle who doesn't care if they do risk breaking their legs.

Women love to believe themselves misunderstood. One never realizes this until one understands them.

Old-fashioned people now get photograph albums especially made; for they are too useful to be snubbed out of existence.

SMILES

GABBY GERTIE

"Lately, nothing more is heard of it when a girl breaks a record."

ALL SQUARE

An old negro had been discovered stealing chickens. The owner decided to speak kindly to him.

"You see," he said, "it isn't the loss of the chickens that worries me. You could always have had one if you'd asked for it. What worries me is that an old fellow like you should be so sinful. Whatever will you do on judgment day when those birds are mentioned in evidence against you?"

The old man showed signs of anxiety.

"Is dem chickens gwine to be dar?" he asked.

"Certainly."

"Den ah gwine say to yo, 'Is dese hyah you chickens, sir?' An' yo'll say, 'Yes,' an' Ah'll say, 'You take 'em, sah, yo take 'em.'"—London Tit-Bits.

HER PREFERENCE

"Madam, do you like the Cinema?"

"Well, yes I do, but I believe I like the peppermint better."

With Feeling

Every life has some great sorrow,
Every heart some pang of pain.
And I have a date tomorrow
With my dentist once again.

Genuine

"That wool stock I bought must have been the real thing."

"Why? Didn't it drop during the slump?"

"Certainly. It ran true to form and shrunk on the first wash."—Boston Transcript.

THE NUGGET PAGE OF MINING NEWS

CALAVERAS COUNTY

A survey of county records shows that 145 mining claims were located in Calaveras county during the past fiscal year and during the same period assessment work on 143 claims Squellati. The fiscal year for doing was reported to County Clerk John assessment work and locating mining claims will close at noon, July 1.

According to Squellati, the number fo claims located during the past year shows an increase over the two previous years.

SISKIYOU COUNTY

The Siskiyou Syndicate, also known as the Quartz Valley mine, has installed a J. B. Pratt rod mill. It has 3500 pound steel rolls and crushes the ore on an average of 18 to 25 tons in 24 hours.

The mill weighs 8265 pounds and has a mechanical feeder. It feeds through a hollow trunnion bearing. The mill has a special classifying head, which returns automatically the coarse product for regrinding.

The mill is running three shifts a day.

William F. Satterwhite and E. D. Murray of San Francisco, with the State Railroad Commission, were in Yreka recently to hear the case of the Victory Gold Mines Company, wherein complaint had been made by the company, asking that the California Oregon Power Company be prevented from abandoning its power line over Salmon mountain.

The California Oregon Power Company claimed it was receiving no revenue from this line, so decidedl to abandon it. The case did not come to a hearing, as the officials of the Victory mines withdrew their objections. A. M. Duley of Los Angeles, president of the mining company, and John Nefroney, manager, were in Yreka. Gregory Harrison, attorney from San Francisco, representing the California Oregon Power Company, was also present.

A tentative agreement was reached wherein the attorneys for both companies will draw up papers, after which the power company will abandon the line. It was built a couple of years ago with the expectation that sufficient revenue would be received to justify it.

Judge C. J. Luttrell rendered a decision June 23, in the case of W. L. Roberts and Mabel C. Roberts against Harry R. Dimmick and William Corbett, in favor of the plaintiffs.

The case was tried in September, 1929, and involved the title to the Bill Bull mine, located July 1, 1927, and the June Bug Mine, located July 1, 1928. Before the death of Ike Kleaver, the original owner of the mine, he deeded to his niece, Bertha Roberts, his mining interests.

As she did not do the assessment work, W. L. Roberts relocated the mines in lieu of such work. Harry Dimmick and William Corbett also filed location notices, claiming the assessment work had not been done. The case created considerable interest at the time it was on trial and the decision has just been handed down.

MARIPOSA

J. C. Kemp Van Ee and J. C. Kemp Van Ee, Jr., mining men of San Francisco, were in Mariposa recently making an inspection of the Colorado Quartz gold mine in which they are interested.

SONORA COUNTY

The Santa Rosa Quicksilver Mining company, Ltd., with capital of $200,000, has filed incorporation papers. Directors are F. M. Foye, Ben F. Hall, Joe Vigeant, A. M. Hildebrandt and C. W. Anderson.

SHASTA COUNTY

The Redding Consolidated of Nevada, which over a year ago acquired what is generally called the Boswell mine near Middletown ,located forty or more mines last mining year in the same neighborhood. The whole mountain side was staked out in mining claims.

The company has filed notices that these claims have been joined in groups. The Prosperity, Hermit and Helen G. are consolidated as the Prosperity group.

Under the name of Quartz Ridge group are the Copper Stain, Copper Fumes, Old Prosperity, Quartz Ridge, Old Jefferson and Iron Ledge.

GOLD SUPPLY WILL HAVE TO

(Continued from page one).

United States was 4,887,607 ounces. In 1929, it had fallen to the alarming total of 2,126,027 ounces (a decline of about 55 per cent). This decline would have been greater, moreover, had it not been for the production from our copper, lead and silver mines, which accounted for 575,000 ounces of the 1929 gold production of 2,128,027.

This by-product gold will decrease because of the shut-down of many copper and silver producers—low metal prices prevailing. And this sensational falling off in gold production has occurred in the face of the tremendous expansion of American business, the successful carrying on of which indefinitely requires more and more gold from the mine.

Is it any wonder then that the economists and financial philosophers have been pacing the floor of nights?

H. C. of L. No Reason

The argument is advanced that the decline in gold mining and production was due exclusively to the high cost of living resulting from the war. But this is by no means wholly true. No sensible person would undertake to deny that this factor, particularly as affecting the cost of mine supplies, transportation, power, wages, etc., added greatly to the burden of the miner for gold, but it does not by itself explain the heavy decline in the production of gold.

The record of two outstanding American gold mines, the Alaska Juneau and the Homestake, is a complete answer to this contention. During the period of the war, and up to 1929, their joint operations were highly profitable. An important fact to be noted in this connection, moreover, is that the ores of the Alaska Juneau mine, which continued to operate so profitably during the entire period, ran only ninety cents in gold to the ton.

It is interesting to observe, furthermore, that the copper mine, except for a brief period around 1921, continued to operate profitably during the entire period, although the price of copper metal suffered a decline to around 12 cents per pound and lower, and proportionately the copper operators suffered the same from the high costs of living as did the gold miners.

But capital went freely into copper, in spite of the handicaps of high costs; whereas, for some singular and as yet unexplained reason, it avoided gold as though it were something unclean.

The best explanation of this attitude by capital toward gold seems to be that for the period following the last Wilson administration ,capital, both through deliberate oragnization and unconscious leanings, dedicated itself to the great astonished attention of the world since the election of President Coolidge.

During that period it became unfashionable to deal in anything else but "industrials," which, for the sake of the argument of capital, included the coppers.

As for investments in gold mining however, why "it was just not being done." It was distinctly unfashionable, and would have been regarded as a breach of Wall Street etiquette.

The New Gold Era Is Here

However, the new era is about to dawn for gold. The world is striving for gold, and needs it in greatly increased quantities,—far more so than ever before in history. The need for new gold is so pressing that many conservative financial writers and economists are advocating a government subsidy of ten dollars per ounce for the gold miner to encourage production, and various other plans of governmental aid to the gold miner have been proposed. But it seems that these expedients will hardly be necessary, as capital at last has turned a friendly eye toward the gold miner and manifested a disposition to cooperate with him—him whom it has shunned for so many years.

The situation furnishes to the gold miner a last his long looked for and patiently awaited "place in the sun." It is the history of American gold mining that capital is never so readily available as during a dull period on the big Exchange which follows an outstanding but collapsed boom in the "industrials," "railroads" and "utilities." Innumerable instances of this may be cited. This fact, taken together with the great and growing need for gold, should provide abundant encouragement to the owner of gold properties of proven merit, or even of promising prospects.

Capital Coming Soon

In respect to the latter, it is almost certain that capital will be generously available very shortly for exploration and development of new gold mines, while as to production from proven ones, capital will be obtainable in abundance.

The "knowing" mine operator can put his hands on many partly, and nearly completed, gold propositions of great potential merit which need only the intelligent appreciation of investors who can apply reason to scientific and sincere developments.

A word should be said in reference to the high grade deposits, of which in scattered localities, and at certain intervals, sensational discoveries are sometimes made. The world still remembers the marvelous discveries in different parts of Colorado, notably at Cripple Creek; the record-breaking strikes in Alaska in the early nineties, and in 1906-7 the sensational discoveries in the Hohawk, Florence, Combination and other rich mines in the great camp of Goldfield, Nevada. Indeed, there are many men now living who from personal experience recall thestirring scenes that accompanied the discovery of gold in California, which startled the tide of migration westward and laid the foundations for the wonderful empire on our Pacific Coast.

High-Grade Provides Thrills

While it has been demontsrated that gold mines of low grade (like the Alaska Juneau, for example, whose ore average only 90 cents per ton) can be operated profitably, it is of course true that vastly larger profits in the minimum of time comes from the high-grade deposits, like those of Goldfield, for example. Moreover, it is these mines that furnish the thrill and romance that make gold mining the most fascinating of pursuits, not only for the miner, but for the investor and shareholder as well. Herein we find the lure that since the dawn of history has enticed man, as no other force could, to the remotest outposts of the wrld, regardless of incredible hardships, whether n the glaciers of Alaska, the hot sands of Australia, or the boiling deserts of Ariona and Death Valley.

In the grand economy of nature, God seems to have decreed that these high grade treasure vaults of gold shall be opened only at stated intervals, and no amount of engineering skill is competent to speed the day of discovery. As a matter of fact, nearly all gold discoveries of great richness have been made by humble prospectors, or by men utterly ignorant of metals and minerals and the science of geology.

When the hour strikes for a new treasure vault of gold to be opened to the world, the role of actual discovery falls to the lot, not of your trained geologist and engineer, but the humblest and least informed of men—your pony express rider, your sheepherder who follows his flocks for months alone across the trackless desert, your covered wagon pioneer, your cowboy, and even your untutored Indian of the western wilds.

Regardless of the means of discovery, however, that man or group of men is to be envied who draws the coveted capital price of a rich, high-grade discovery of gold, whether in the placers of California or the rich quartz veins of Nevada, Colorado, or elsewhere.

In conclusion it is interesting to note the fact that during recent months several new gold mining enterprises have begun important operations in the development of ancient buried channels of many prehistoric gold-bearing rivers.—Mining Truth, Spokane, Wash.

When young people play hard...

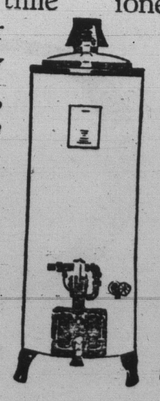
hot water—*instantly,* is a blessing!

Saves 4 to 6 hours each week

Happy days for the young people mean additional cares for mothers.

But plenty of hot water at the turn of the faucet washes away the trouble. Throughout the year too, it saves your time—by giving you hot water without delay, by quickly dissolving dirt and grease, by making it easy to keep things sweet and fragrant.

When men stop at fine hotels they like the hot water at a turn of the faucet—for bathing and shaving. It's this same service that is brought to your home by Automatic Gas Water Heater. Because of its insulated tank and efficiency, the cost is less per gallon to heat water with an Automatic Gas Water Heater than with the old-fashioned methods of waiting for water to heat.



And once you install the excellent service, there's never any bother about having an abundant supply of hot water—day and night.

Come into our office or a dealer's store and see the modern heaters. Or just telephone and our representative will call.

SOCIETY HAPPENINGS OF THE PAST WEEK OF VICINITY

MRS. REITA CARPENTER DIED IN OAKLAND HOME

Mrs. Reita Carpenter, nee Rodda, who lived in Grass Valley a number ofyears ago and was well known there died at her home in Oakland last Tuesday at the age of 54.

She is survived byher mother, Mrs. James Rodda, and three sisters: Winnie, Ada and Zina.

MASTER MASON DEGREE CONFERRED WEDNESDAY

Past Master T. M. Harris conferred the Master Mason degree at the Masonic Lodge in Grass Valley last Wednesday evening. A large number of visitors from outside points as well as the local members were present for the ceremony.

MRS. EDGAR E. BARKER HONORED AT BRIDGE

A lawn luncheon and bridge party was given by Mrs. F. T. Nilon in honor of her niece, Mrs. Edgar E. Barker ofBerkeley. Mrs. Barker is a former resident of this city.

Aabout twenty friends were present and after the luncheon bridge was enjoyed for several hours. Prizes were won by Mrs W. G. Richards, Mrs. Gordon Bettles, Mrs. E. M. Rector, and Miss Savory Ford. Mrs. Barker and Mrs. Helen Houghton received the guest gifts.

MRS. BEULAH COOMBS NAMED DISTRICT DEPUTY

The grand president of the Native Daughters has appointed Mrs. Beulah Coombs of Manzanita Parlor of Gras Valley district deputy grand president of Laurel Parlor of Nevada City.

JANET SAMPSON WINS MILLS SCHOLARSHIP

For the third consecutive year, Miss Janet Sampson, daughter of Mr and Mrs. William Sampson of Grass Valley, won the scholarship at Mills College awarded by the Native Daughters. Miss Sampson is a graduate of the Grass Valley High School and is now registered at Mills College as a pre-medical student.

MIROV EXPLAINS PINE PRODUCTS TO ROTARIANS

N. T. Mirov, manager of the California Pine Products Company of Nevada City, was the guest of the Grass Valley Rotary Club at a luncheon last Monday and explained the operation of the plant and the future of the industry in this locality.

The company has at present about 80,000 cups placed on trees gathering pine pitch. It is estimated somewhere around 500,000 cups can be placed when the entire field is covered. The Nevada City plant is the only turpentine plant in the United States outside of the Suthern states. Several shipments of turpentine and resin have already been made to San Francisco.

Mr. Mirov also spoke of heptane, a product which is secured from the Digger and Jeffrey pine, and is quite valuable. Pamphlets on heptane can be had by writing the farm advisor's office at Grass Valley.

PERSONAL MENTION

Mr. and Mrs. Cornelius Mahoney of Sacramento and Mr. and Mrs. Fred York and Mr. and Mrs. E. J. N. Ott, Jr., and son spent the holiday week-end at the Ott home. The visitors were highly pleased with the parade and with the large collection of old relics. They state that they have attended many '49er celebrations, but have never seen a better one.

Mr. and Mrs. Bert Ninnis of San Francisco are visiting relatives here for a week. They plan to spend the following week-end at Lake Tahoe.

Miss Eileen Huy of San Francisco spent a few hours on the Fourth with her parents.

SHOBE VISITS NEVADA CITY

Preston L. Shobe, executive vice president of the Italian Investment Corporation, which has taken over the Nevada County Building and Loan Association, was in town last week making an executive visit to the local offices of the concern.

H. B. Dow will continue as manager of the local branch and the offices will be in the Dow building as heretofore.

WILLIAM HOME SOON TO LEAVE FOR SCOTLAND

A farewell party was tendered William Home of Leiters force who issoon leaving for Scotland. Mr. Home was presented with a nugget pin which was presented by John J. Fortier on behalf of those present who were: F. F. Breese, V. V. Foley, John W. O'Neill, R. Wright, Gilbert Clark, Henrq Richards, John Fortier, T. Tobiassen, Myers Mobley, and Arthur Hoge, Jr.

MESERVEY CELEBRATES 80TH BIRTHDAY TUESDAY

W. E. Meservey of Twn Talk passed his 80th birthday last Tuesday andthe occasion was celebrated at the evening meeting of the O. E. S. of which Mr. Meservey is a member. He is also one of Nevada City's most prominent Masons, being active in all the affairs of Masonry and having held nearly every office in the order. A very delightful evening was had by all.

LION'S CLUB AND BOY'S CLUBS ENJOY MELONS

Last Tuesday evening the Lions Club entertained the Columbia Park Boys Club of San Francisco at Lake Olympia with a watermelon feed. The Lions enjoyed a program by the boys which followed the Lions meeting at which a short talk was made by Henry Raphael, camp director of the boys club.

Olympia Park has been chosen as the permanent camp of the boys as it was found to offer the best advantages, everything considered, of any place in the state. The camp will continue for one more week.

FORMER GRASS VALLEYAN DIES IN SAN FRANCISCO

Edward John Bastian, a former resident of Grass Valley, who has been employed for some time past as a teamster in San Francisco, dropped dead dead while at work last Monday.

Mr Bastian was a native of England and came to Grass Valley when a child and grew to manhood there. He was at one time employed at the Maryland mine and has many friends in Grass Valley who will be grieved to hear of his passing.

GRASS VALLEYANS WED AT RENO RECENTLY

Willis King, and Nellie Whitescarver, both of Grass Valley, have just returned from Reno where they were recently united in marriage. They plan on making their home in Grass Valley.

"Jerry" Seawell of Roseville, Assemblyman of the Third District, accompanied by Mrs. Seawell and children and Mrs. Seawell's mother, Mrs. Brown, spent the Fourth in Nevada City.

Mr. and Mrs. Ed Tully and daughter, Patsy Lou, spent the week-end at the Fred Tredennick home.

Mr. and Mrs. Ben Renfre and children of Oakland spent the holiday week-end with Mrs. Ed Norton.

Mr. and Mrs. Clarence White and four children of San Francisco visited over the holiday with Mr. and Mrs. Lloyd Jennings.
